SUMMARY

As an aspiring Bachelor of Data Science, I am passionate about using data to drive insights and solutions. With a strong foundation in frontend development, I can create engaging, user-friendly web applications using React and ASP.NET. I am eager to expand my knowledge and grow in a dynamic environment where I can contribute and learn. I look forward to the opportunity to work with you in the future.

EXPERIENCE

Frontend Developer Intern **Long Cam** **March 2024 – Present**

- **Framework Proficiency:** Developed common-level proficiency in **React** through project-based application, using it effectively to create dynamic and interactive user interfaces. Focused on core functionality, state management, and component-based architecture.
- **Project Reporting:** Prepared daily and weekly progress reports to keep team members updated and aligned with project goals.
- **Team Collaboration:** Actively collaborated with cross-functional teams to achieve project milestones, enhancing skills in teamwork, communication, and adaptability.

Frontend Developer Intern **B24** **May 2023 – September 2023**

- **Frameworks & Languages:** Gained foundational understanding of **Angular** and **C#**, applying them in a hands-on capacity to build and refine project components. Focused on learning core principles, structure, and syntax, achieving a practice-level proficiency.
- **Frontend & Backend Skills:** Developed and strengthened skills in frontend and backend development, working extensively with **Angular** and **C#**. Enhanced my understanding of **Blazor** by studying documentation and applying it in projects.
- **UI Design:** Used **Tailwind** CSS to build responsive and visually appealing interfaces, ensuring a consistent user experience across devices.
- **Collaborative Development:** Worked closely with backend teams to streamline data flow and improve integration between front and back end.

PROJECTS

E-commerce App – Personal Project **Oct 2023**

- Built a fully functional e-commerce application with a focus on user experience, robust functionality, and seamless backend integration.

- Features: Integrated secure login, admin controls, order tracking, and PayPal for a smooth and user-friendly shopping experience.
- Technologies: React + Vite, Node.js, Tailwind, Redux Thunk, Express, MongoDB, React-Router, Axios, Ant Design.
- Github: [MinhDuy0i0909090/E-commercev2](https://github.com/MinhDuy0i0909090/E-commercev2)

E-commerce App – Personal Project

July 2024

- Designed and coded enhancements for key e-commerce elements, including posters and shopping cart interfaces, focusing on both functionality and visual appeal. Used **Figma** to draft and refine visual concepts.
- Technologies: React + Vite, Tailwind, Figma
- Github: [MinhDuy0i0909090/ReactEcommerce](https://github.com/MinhDuy0i0909090/ReactEcommerce)

Traffic Sign Detection and Localization Using MobileNetV2 – Group Project

December 2023

- Developed a high-accuracy web app for traffic sign prediction, achieving 99% accuracy in detection and localization using **TensorFlow** and **MobileNetV2**.
- Features: Integrated with **Gradio** to enable real-time, interactive sign detection through a user-friendly interface.
- Technologies: Gradio, Bootstrap, TensorFlow
- Github: [MinhDuy0i0909090/TrafficSignClassification](https://github.com/MinhDuy0i0909090/TrafficSignClassification)
- Demo: [Traffic Sign DL Model - a Hugging Face Space by JKC013](#)

EDUCATION

Graduated

HUFLIT

September 2020 - Oct 2024

- Bachelor of Science in **Data Science** - **GPA:** 7.75/10
- Achievements: Awarded scholarships in Term 4.

SKILLS

- **Frontend:** JavaScript (ReactJS, React Native, React Query, Redux), CSS frameworks (Bootstrap, Tailwind, Ant Design)
- **Backend:** Node.js, C# (ASP.NET, Blazor), PHP
- **Databases:** Microsoft SQL Server, MongoDB
- **Languages:** English (TOEIC Score: 685 – Listening & Reading)
